

## Introducing

## GUIDANCE® PRE PROSTATE BIOPSY RECTAL SWAB TEST

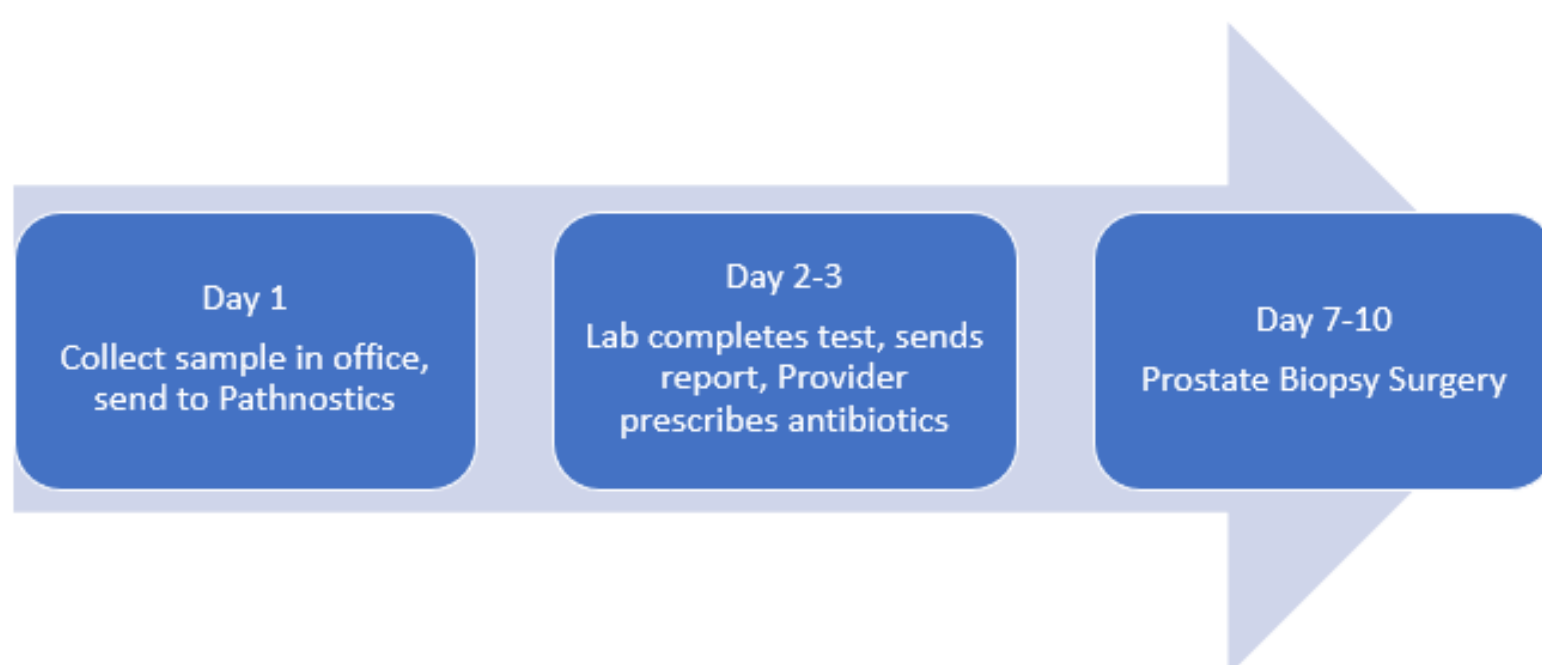

### WHAT IS GPPBRS TEST?

- The Guidance Pre Prostate Biopsy Rectal Swab (GPPBRS) test identifies antimicrobials that may be used prophylactically by using our patented Pooled-Antimicrobial Susceptibility Testing technology to determine the presence or absence of resistance genes.
- When an appropriate antimicrobial is used before and after the prostate biopsy procedure, the risk of infection is reduced.

### WHO SHOULD USE THE TEST?

- Urologists performing a prostate biopsy using Trans Rectal Ultrasound (TRUS) Guided Prostate Biopsy procedure.

### TEST TURN-AROUND TIME ENABLES ANTIBIOTIC STEWARDSHIP

### FACTS ABOUT THE TEST

#### Organisms Tested

- Enterococcus faecalis
- Escherichia coli
- Alloscardovia omnicolens
- Viridans Group Strep
- Streptococcus agalactiae
- Coagulase Negative Staph Group
- Klebsiella pneumoniae

#### Resistance Gene(s) Associated with the following antibiotics

- Macrolide Resistance
- ESBL Resistance
- Broad Spectrum\*
- Vancomycin Resistance
- Ampicillin
- Fluoroquinolone/Quino
- Methicillin Resistance
- Carbapenem Resistance

\*Resistant genes identified confers resistance across multiple classes of antibiotics including penicillin derivatives, cephalosporins, monobactams and carbapenems

#### Antibiotic Susceptibility Testing

- Amoxicillin/Clavulanate
- Nitrofurantoin
- Fosfomycin
- Ampicillin/ Sulbactam
- Sulfamethoxazole/Trimethoprim
- Cefaclor
- Meropenem
- Ceftriaxone
- Cefoxitin
- Vancomycin
- Ciprofloxacin
- Ampicillin
- Piperacillin/Tazobactam
- Levofloxacin
- Cefazolin
- Ceftazidime
- Cefepime
- Tetracycline
- Gentamycin

To order the test or receive more information, call Customer Care at (714) 966 – 1221, Option 1
