

EASY TO READ REPORT FOR PERSONALIZED THERAPY OPTIONS

1 Formulations: Antibiotic formulations are listed as PO (oral), IM (intramuscular), and IV (intravenous). PO formulations are bolded to help identify oral antibiotics.

2 Pooled Phenotypic Sensitivity: Personalized therapy options can be quickly identified by referencing the P-AST™ results. “S” denotes antibiotics that showed susceptibility and are listed on the left; “R” denotes antibiotics that are resistant and are listed on the right.

3 Resistance Gene(s) Detected: Antibiotics that have resistance detected are denoted by “RGD”.

4 Supporting Evidence: Checkmarks are present if the antibiotic has supporting evidence or FDA approval for use with the organism.
